BIO AQUA

NanoZyme CLEAN BIO AQUA

NanoZyme CLEAN BIO AQUA is a patented low cost and highly efficient product used to eliminate odors caused by hydrogen sulfide (H₂S).

NanoZyme CLEAN BIO AQUA is a 100% safe ecofriendly product made up of an aqueous mixture of non-bacterial enzymes produced using food grade materials. There are no living microbes in **NanoZyme CLEAN BIO AQUA** which allows for a safe and stable product capable of degrading or neutralizing many noxious compounds in situ.

NanoZyme CLEAN BIO AQUA does not mask odors but eliminates them by using a customized system developed by NanoZyme Technologies. This versatile system uses a small footprint which saves time and money.

PRODUCT SPECIFICATIONS

Ecological Information

Non-toxic, non-hazardous, safe for the environment. This product is readily biodegradable according to OECD Method, Modified Sturm Test. Complies with: HAZARDOUS WASTE BIOASSAY SCREENING REPORT ACCORDING TO US DEPT. OF FISH AND GAME.

Regulatory Information

Product complies with all known regulatory considerations and is unregulated and not listed as a Hazmat by any agency.

Directions For Use:

Applications can be adjusted accordingly to the area being treated and the Enzyme Vaporization Unit being used.

NANOZYME
TECHNOLOGIES

NanoZyme CLEAN

BIO AQUA

BENEFITS

- Decreases VOC such as Ammonia, Amines, H₂S, Ketones, and Mercaptans.
- Eliminates H₂S and odors quickly and efficiently to save time and money.
- Helps reduce sludge and bio-solids.
- Improves anaerobic digestion.
- Increases oxygen that has been dissolved.
- Enhances wastewater discharge
- Eco-Friendly Chemistry that is safe for the environment and does not harm equipment and electronics.
- Product works in an open or closed water environment.

APPLICATIONS

NanoZyme CLEAN BIO AQUA is designed for system wide aqueous application, from the head works to The press room.

Steady low volume enzyme introduction relative to overall flow allows for longer duration and high remediation activity levels throughout the system.

Over time, with direct injection applications, our technology will help clean and keep the entire system odor free end to end. Its catalytic technology keeps working as long as it's substrate values exist. The product does not decay or lessen it's effectiveness over time.

The Journey To Cleaner Air And Water Starts Right Here.
